Anhdao Truong, Chief, Drinking Water Program LA County DPH-Environmental Health Environmental Protection Branch-Local Primacy 5050 Commerce Drive, Baldwin Park, CA 91706-1423		(626) 430-5420	(213) 270-5568

4. If the above personnel cannot be reached, contact:

Office of Emergency Services Warning Center (24 hrs.) (800) 852-7550 or (916) 845-8911
When reporting a water quality emergency to the Warning Center, please ask for the California State Water Resources Control Board – Division of Drinking Water Duty Officer.

E. JOAQUIN ESQUIVEL, CHAIR | ERIC OPPENHEIMER, EXECUTIVE DIRECTOR

500 North Central Avenue, Suite 500, Glendale, CA 91203 | www.waterboards.ca.gov

PLAN I (Medium Community)

During regular working hours our people will contact the news media at television station KXYZ to broadcast the necessary warning. The local radio stations will also be contacted. The television and radio personnel are available at all hours. As a follow-up measure, we will also contact the Daily Bee, a local newspaper that serves both Outtown and Hometown.

The warnings will be issued in both English and Spanish to cover all members of the community. Outlying areas of the water service area (such as Isolated Canyon and Lonesome Mountain subdivisions) will also be notified by sound truck and/or handbill distributed to their respective areas. Both of these areas are very small and this can be done quite quickly.

A special telephone answering service can also be quickly set up at the utility headquarters (using the regular company numbers) to answer questions that will come in from consumers. Questions are anticipated, especially from the Hometown area, because that area is served by three different water companies. A map will be available to the telephone answering personnel to determine the water company serving the caller.

It is anticipated that the time for notification to the television and radio audiences will be very short. The areas served by handbill and sound truck will also be notified within an hour. For notification to be issued in other than normal hours, the same media will be contacted, and an announcement will be scheduled for as long as is necessary. A sound truck(s) will be used in the early morning hours to quickly alert the people not listening to their radio or television.

PLAN II (Small Community)

Our community is very small and the most efficient means of notification will be both sound truck and handbill. It is estimated that the entire service area can be covered in less than three hours.

29 USERS

PLAN III (Large Community)

The same plan as implemented in Plan I should be used here with the exceptions noted. All the news media will be contacted in the entire metropolitan area. This includes all television and radio stations and all local and general area newspapers. Maps have been prepared to be distributed to the media to locate the boundaries of the water company. This system is large enough that it may only be necessary to notify some of the water users. This information will be transmitted to the media and an answering service at the water company will respond to consumers' calls. Unless the problems are limited to isolated areas it is unreasonable to assume that contact can be made through sound truck or handbill.

LBWC

2/22/25

Please provide the following information as follows.

1 Person responsible for water shortage planning and response for the water system.

Danny Ainsworth

2 In the event of a severe water shortage or catastrophic water outage:

• Well Driller for repairs (if applicable).

Not Applicable

- Provide the name of a CDPH approved water hauler. List of CDPH approved water haulers: [Water \(ca.gov\)](http://Water.ca.gov)
- Provide your County OES contact. ehduty@ph.lacounty.gov and 213-270-5567 After hours

Wendy's Water Company Pearblossom Ca

NOTIFICATION PLAN

Attach a written description of the method or combination of methods to be used (radio, television, door-to-door, sound truck, etc.) to notify customers in an emergency. For each section of your plan give an estimate of the time required, necessary personnel, estimated coverage, etc. Consideration must be given to special organizations (such as schools), non-English speaking groups, and outlying water users. Ensure that the notification procedures you describe are practical and that you will be able to actually implement them in the event of an emergency. Examples of notification plans are attached for large, medium and small communities.

Emergency Notification Plan

**Little Baldy Water Company System No. 1900158 2/22/25
20745 fort Tejon Rd, Llano, Ca 93544**

Dear Customers and Fellow Little Baldy Water Company Members.

In January 2025 we had a positive result from our well site testing for Coliform. This notice is to inform all customers of this test result .

Our current test have shone a negative for any Coliform, during the month of January we adjusted the chlorine we add to the system .This is the proper way for our system to handle the change in our system.

A reduced amount of water from the wells and surface water that feeds the wells, Can play a big part in a rise in Coliform .

If you want to release your information to the State they can send someone out to test at your house for Lead, Repairs on your side of the the water system would be at your expense.

Proof Of Notification

Notifications have been sent by mail (2/25/25) to all customers and this .

Notice is posted in the Lobby of The Water Company.

Field Mgr. Dan Ainsworth has also contacted many of the users.
